

XM Radio has brought back the quality programming I want in my car and home. To many radio stations continue to play the same thing over and over without ever giving us more. XM allows me to choose what I want and not hear the continous repeat of commercials or songs. Just like with Satellite TV having the ability to provide local content the Satellite radio services should be able to provide the same. I would love to listen to my local team on Fox sports or ESPN than listen to the AM station that is never clear in my area. LOCAL PROGRAMMING MUST HAPPEN!!!
